To

The Registrar,

Rashtrasant Tukoji Maharaj Nagpur University,

Nagpur, Maharashtra

Subject: Suggestion for up gradation of University syllabus as per the feedback received from our stakeholders

Respected Sir,

This is to bring to your kind information that Nagarjuna Institute of Engineering, Technology and Management is running B.Tech (Mechanical, Civil, Electrical, Computer Science, Artificial Intelligence and Machine Learning and Master's in Business Administration courses. We, from our institute wish to offer a constructive suggestion aimed at enhancing university syllabus. Through careful examination of feedback's obtained from various stakeholders, we have identified key areas that require attention and specialization to elevate the quality of education imparted. It is our humble request and suggestion to the university to consider the following suggestions.

Our stakeholders have expressed a strong desire for startups, innovation and entrepreneurship.

Feedback from industry professionals and alumni highlights the need for comprehensive understanding of communication skills and speaking skills. Problem solving, design thinking, Software skills and time management skills integrating the specialized module of elective courses on these subjects will certainly benefit students, allowing them to explore emerging trends and to gain competitive edge in their respective domain areas.

The stakeholders have also stressed the importance of hand-on experience, experiential learning and practical applications of theoretical concepts. We recommend the inclusion of more experiential learning opportunities which will bridge the gap between academia and industry 4.0.

Stakeholder feedback also emphasized the need to include more specializations in connection with engineering and management in the university prescribed syllabus. In light of this input we propose considering the addition of the following emerging domain areas within the engineering and management discipline:

- Artificial intelligence and Machine learning
- Statistical Process Control
- Renewable energy engineering
- Industrial engineering and production management

- Supply chain management
- Software testing

We firmly believe that implementing these suggested improvements will not only enhance the learning experience but also address the evolving demand of the job market. We are eager to collaborate with the university administration and faculty to bring about positive changes that will benefit the entire student community.

By incorporating specialized subjects and providing practical exposure, our university may ensure that graduates are equipped with necessary skills and knowledge to excel in their chosen careers.

We kindly request you to consider our suggestions based upon the feedbacks collected from various stakeholders and analysis to initiate a discussion on the potential implementation of these improvements.

We expect the suggestion of our feedback analysis will be looked into the interest of the students and university.

With warm regards,
